No. 13-B, Tharakadu, Subramaniam Nagar,
Veerappampalayam.
Erode-638 012, Tamil Nadu.

Respected Sir,

SUB: Dept. of Bio-Technology - Approval of. Start-up Incubation of protocol for the
"Bioremediation of chromium contaminated soil by biological method" Sanctioned to
ELISE BIOTECH -for the development and commercialisation of the product (2015-2016) -
Approval -reg.

Incubation & Innovation centre at Thiruvalluvar University aids the start-up innovation, research and entrepreneurial activities in technology-based areas.

This is certifying that ELIES BIOTECH, Erode submitted their protocol for the
"Environment benignant compounds for bioremediation of toxic metals" for one year (2015-2016) to facilitate their commercially viable products for Socio-beneficial arena.

Thanking you.

Yours faithfully

Protocol for Mushroom Cultivation

Dr. P. William James
EFGC BIOLOGICAL FARM
Sembakkam, Chennai, Tamil Nadu

OBJECTIVES

OBJECTIVES

Whereas one of the Principal duties of modern institution of higher education is to enable students to acquire hands on experience and this experience is a valuable element in the preparation of their professional careers.

Whereas Institution of Higher education should have documentation and regular information scientific progress of research and training in the fields related to their programmes of academic strength, enter into this agreement and within the limitation of variable funds and policies decision of their governing bodies and executive officers, agree to a program of co-operation which may include any or all of the following:

To promote interaction between University and Biological Farm in natural and social sciences and related areas.

To provide a formal basis for initiating interaction between University and Biological Farm.

Technical collaboration between the University and the Biological Farm.

Protocol for Honey bee cultivation

Dr. P. William James
IFGC BIOLOGICAL FARM
Sembakkam, Chennai, Tamil Nadu

OBJECTIVES

OBJECTIVES

Apiculture is the practice of keeping and maintaining bees and their hives. The beekeeper is also referred to as the apiarist and the entire colony set up is called the apiary. Beekeeping has grown in popularity in recent years and the raw honey, beeswax, and royal jelly are much sought after products.

To provide a formal training and entrepreneurship for the cultivation of honey bee in our campus with Biological Farm, Chennai

of Chromium Contaminated Soil by Biological Method

Dr. ARAVIND SELVARAJ
FOUNDER & DIRECTOR
Erode – 638 012, Tamil Nadu, India;

OBJECTIVES

- ### OBJECTIVES
- Tanneries are the major industries in Tamil Nadu and particularly in Villupuram District, places like Rangepur, Ambur, Vaniyambadi and Perampalli continue to maintain the dominant positions
 - Tanneries are the major industries that use chromium for the treatment of leather and nearly 40% of the chromium used is released into the environment as sludge which contaminates surface water as well as ground water (Kannabalan *et al.*, 2003)
 - To throw light on the nature of tannery pollution and conservation of inland water resources, the present study is necessary to examine the extent of its pollution in water, sediment and freshwater fish which is available in and around Palar belt of tannery industrial areas like Vaniyambadi, Rangepur and Ambur of Villupur district, Tamilnadu.
 - To develop suitable Microbial Consortia Product for bioreduction of Cr (VI) to Cr (III)

PROTOCOL

PROTOCOL

Medium for chromium uptake studies

Chromium uptake studies were carried out in CA-M9 Minimal Media with the following composition: $\text{Na}_2\text{HPO}_4 - 0.55 \text{ g/L}$, $\text{KH}_2\text{PO}_4 - 1.5 \text{ g/L}$, $\text{NaCl} - 0.25 \text{ g/L}$, $\text{NH}_4\text{Cl} - 0.5 \text{ g/L}$, $\text{MgSO}_4 - 0.12 \text{ g/L}$, $\text{Casamino Acid} - 10 \text{ g/L}$, $\text{Glucose} - 5 \text{ g/L}$. A 5000 $\mu\text{g/L}$ stock solution of potassium dichromate was used as a source of Cr(VI) in the experiment.

The bioremediation of tannery effluent has gained substantial interest and importance. This urgent need of this project is raising public awareness of tannery effluent treatment, identifying best practices and establishing global standards in tannery industries. The present proposal focuses on implementation of "eco-friendly Autochthonous Bioremediation" (SAB) technique to clean the chromium contaminated pearl river basin. Thus, the present AFRIAR aimed at devising chromium resistant microbial

Thus, the present STARTUPS aimed to develop chromium resistant microbial consortia for treatment of tannery effluent contaminated in Pear river basin, vellors. This basic applied research on the treatment of tannery effluent, by using chromium resistant bacterial species will be used to develop a new approach EAS for the bioremediation of contaminated Pear river basin. The results of this study provide suitable chromium resistance autochthonous "bioremediation" was identified. Besides, the depositing of this industrial strain will be used for tannery industries and may offer potential tools for future application in bioremediation processes.

Entrepreneurship Faculty Development Programme (EFDP)

The inauguration of Entrepreneurship Faculty Development Programme (EFDP) for the faculty members, teachers, placement officers and co-ordinators of Entrepreneurship Development Cell working in Arts and Science, Engineering and Technology colleges was conducted on 20th November, 2014 at Thiruvalluvar University, Serkkadu Campus, Vellore. This programme was jointly conducted by Thiruvalluvar University and Entrepreneurship Development Institute, Government of Tamil Nadu, Chennai.

The programme was presided over by Dr. M. Jayakumar, Registrar, Thiruvalluvar University. He stated that this programme was the second of its kind conducted in this University to motivate the teachers and young college students. An entrepreneur is not only an organizer or co-ordinator, he acts as innovator and inventor who introduces new products in the market. He has quoted top ten entrepreneurs in India who are popular at present and the struggle they met at the past. This is a government programme which provides awareness on starting new ventures. He stressed the importance of hard work.

In his inaugural address, Dr. P. Gunasekaran, Vice-Chancellor of Thiruvalluvar University stressed the importance of creating awareness on entrepreneurship and make every college students to become an entrepreneur and provide job opportunities. The education system should inculcate entrepreneurship values among students. Every college student should become a job provider and not a job seeker. Students should not expect only government jobs. They should find some ways and means to provide jobs and make the society skill based and

knowledge based one. Efficient entrepreneurs only can bring innovations. Students should understand the business opportunities and develop entrepreneurship attitude in everyday life.

Students should work hard and take challenging projects and prove their efficiency. They should not go for easy projects. They can have group projects also.

It is the duty of the teachers to identify the students and give awareness on entrepreneurship. It is in the hands of the teachers to identify students and give awareness and create interest among students and make them to live as successful entrepreneurs in the society.

In the special address, Dr. V. Manickavasagam, Registrar, Alagappa University, Karaikudi shared his experiences regarding the entrepreneurship programme conducted at Alagappa University. He pointed out the All India Economic Survey which indicates that only 15 percent of engineering students avail job and the remaining 85 percent of the engineering graduates become jobless in the labour market. Now students show their interest in studying arts and basic life science subjects. He stated that whether the business is small or large, they should show their full interest, involvement and develop their ventures. He quoted many examples of successful entrepreneurs in Tamil Nadu who put their hardworking.

Dr.S.Syed Shafi, Member-Syndicate, has felicitated the programme. Earlier Dr.B.Senthilkumar, Professor and Head, Department of Zoology has welcomed the gathering. Dr.C.Dhandapani, Co-ordinator of the Seminar and Associate Professor of Economics has introduced the theme of the seminar. Dr. V. Peruvalluthi, Professor and Head, Department of English, has delivered vote of thanks.

Entrepreneurship Success Stories - National and International Perspectives

Introduction

Entrepreneurship is the *engine of innovation*. The accumulated tacit knowledge and culture of the entrepreneur are the resources essential to create wealth from research commercialisation leading to technological innovation and the creation of New Technology Based Firms. A successful technology enterprise depends on trained professionals who understand science and who are also skilled in the complexities of technology commercialization. This exciting new program brings together a strong science foundation with chemical / biotechnology enterprises and entrepreneurship, providing a unique educational venue for scientists to better understand the entire technology enterprise and issues unique to the industry.

Global social change, economic volatility, environmental challenges and an evolving international knowledge-based economy require creative, innovative, entrepreneurial solutions. To that end, both developed and developing entrepreneurial economies need to encourage entrepreneurial activity. In part as a result of these efforts, global technology clusters, including bio-clusters, continue to grow. Yet, evidence suggests that a favorable external environment alone is not sufficient for biotech firms' survival and growth; the characteristics of universities and their internal processes are considered pivotal to the trajectory of a local, high-tech economy. Indeed, the core of every bioscience industry cluster in the United States and United Kingdom consists of notable universities. Several international governmental and private agencies in developed countries have created roadmaps and outlined strategies and action items to create more entrepreneurial universities. Despite these efforts, however, it is not clear what constitutes an entrepreneurial university. There are various definitions of an entrepreneurial university, but a lack of agreement about its core components. Our universities have created a trans-disciplinary culture of entrepreneurship, others have focused on relatively narrow technology-based licensing, spin-out or other technology transfer metrics, or delegated the task to specialized programs in their business or colleges.

Academic Entrepreneurship

It is essential to establish an understanding of entrepreneurship before defining academic entrepreneurship. Entrepreneurship has many definitions. For the purpose of this article, entrepreneurship is the process of creating customer-defined value by innovating and exploiting resources beyond our control. This definition incorporates several concepts. First, entrepreneurship is a process, an action-oriented undertaking that requires doing, executing and adjusting to changing conditions. Although planning is an important part of the process, learning by trial and error, early prototyping and taking advantage of a closing window of opportunity is a core concept. There is a definite bias to action. Entrepreneurs triumph over bureaucrats and managers whose primary purpose is to manage resources and protect the *status quo*. As noted by Clayton Christensen in his best-selling book, 'The Innovator's Dilemma', the failure of large companies is attributed to their failure to 'kill the cash cow', that is, these companies did all the right management things but failed to capitalize on disruptive innovations that were game changers, like laptops, mobile phones and online brokerage firms.

Second, entrepreneurship is a means toward an end: creating value as defined in the mind of the customer. Value is the difference between tangible and intangible benefits versus tangible and intangible costs. Different customers or stakeholders will define value in different ways. To an entrepreneur, value might be defined by the market value of her company, the number of jobs created or the size of a new tax base created in the community. To a commercial customer, value might be defined in terms of product features and benefits, service or customer experience. Economic development authorities might define the value of entrepreneurial activities in terms of jobs created in the community. Academic administrators might measure value by the number of grant dollars generated, new programs or courses offered, or improving educational and skills outcomes in their students. In every instance, value is defined and validated by a customer willing to pay for a product or service.

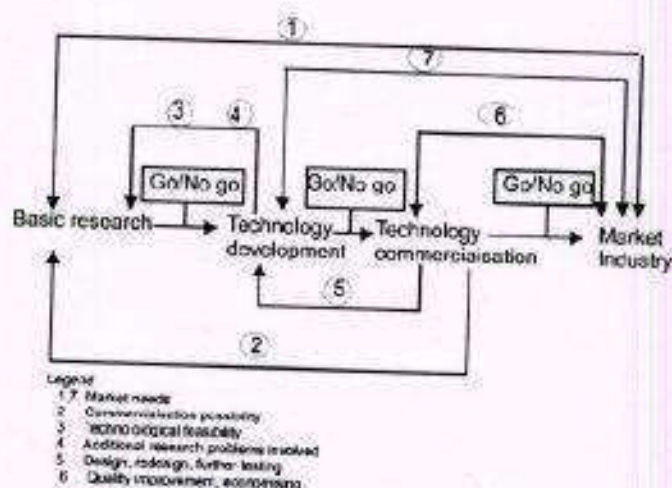

Third, entrepreneurs identify and exploit resources beyond their control. Bootstrapping, skunk works, garage works or work-arounds are core competencies. They are experts at exploiting protected resources – be it time, equipment, money or talent. Finally, entrepreneurs innovate. They create new products, processes, services and business models to satisfy customers' wants and needs. Academic entrepreneurship refers to the

REGISTRAR

VICE-CHANCELLOR
THIRUVALLUVAR UNIVERSITY
SERKKADU, VELLORE - 632 115.

variety of ways in which academics go beyond the production of potentially useful knowledge. They undertake a range of initiatives to facilitate the commercialization of that knowledge, or become participants in designing new marketable products and assume a leadership role in ensuring successful commercialization of these products. Academic entrepreneurship is different from both entrepreneurship education and entrepreneurship training. Entrepreneurship education is usually defined in broad terms as the building of knowledge and skills 'about' or 'for the purpose of' entrepreneurship generally, as part of recognized education programs at primary, secondary or tertiary-level educational institutions; entrepreneurship training is interpreted as the building of knowledge and skills in preparation for starting a business.

Academic entrepreneurship, in contrast, is a feature of universities that do much more than impart entrepreneurship education and training, or excel at technology transfer practice and metrics. Based on the US and European experience, universities may be considered entrepreneurial when they are not afraid to maximize the potential for commercialization of their ideas and create value in society without seeing this as a threat to academic values. They create a culture of innovation on their campuses and attempt to instill an entrepreneurial mindset in every graduate and faculty member by building the structure and processes designed for stimulating innovation and value in the marketplace.

The University model of research commercialisation.

Objectives of the Entrepreneurship in Thiruvalluvar University

Herbal Medicines have gained popularity in the present era and most people are resorting to it sans inhibitions as it provides cure without any side effects and also soothes and rejuvenates the body. The four districts of Vellore, Thiruvannmalai, Villupuram and Cuddalore (the jurisdiction of Thiruvalluvar University) is covered with scrub jungles which has been a grazing pocket from time immemorial. These scrubs jungles have an abundant quantity of untapped herbal plants with medicinal properties thereby creating a potential for field training for students. Individually, the pristine Javadhu Hills also falls within our jurisdiction. Hence, Certificate courses are offered with the association of Al-Kausar Unani International Hospitals which was founded by the esteemed Bade Hakeem Saheb, who has won much appreciation and applause for his achievement and discoveries in the field of Medicine. 1. Certificate Course in Herbal Medicine, 2. Herbal Therapy 3. Basic Unani. The Certificate course provides specialized training for Graduate students in the comprehension and application of herbal medicine/therapy. Professionals working in the complementary alternative medicine (CAM) field will be able to deepen their knowledge and understanding of botanical medicine. Similarly, 2. Industrial Waste Management: In India tannery industry is the one of the largest industry. Particularly in Tamilnadu, in and around Vellore district (Ranipet), the tannery industry pollution is a major problem. We have developed (Department of Biotechnology and Chemistry) the Bio-EK consortia techniques for ready to implement in the tannery effluent treatment plant. From this skill based technique, the students will be able to get the jobs opportunity in the processing industries in India and abroad. The certificate course such as Industrial Waste Management is of paramount importance. We have developed an integrated approach electro-oxidation and biodegradation process for remediation of tannery effluent.

Bioinsecticidal to control Mosquito vector borne diseases: Mosquitoes do not only cause nuisance by their bites but also transmit deadly diseases like malaria, filariasis, yellow fever, dengue, and Japanese encephalitis, it contribute significantly to disease burden, death, poverty, and social debility in tropical countries. Besides, an innovative user and environmental-friendly alternative approach to conventional vector control program is apparently unavoidable and inevitable. In this context, our traditional knowledge on plant-based insecticides would be immensely valuable and helpful. Hence, the use of natural plant products, microbial insecticides (including Biosurfactants). The efficacy of mosquitoicidal

About the Thiruvalluvar University

The Thiruvalluvar University was established in Vellore by Government of Tamilnadu in October 2002 under the Thiruvalluvar University Act, 2002 (Government of Tamilnadu Act 32 / 2002). The Post Graduate Extension Centre of the University of Madras, which was functioning in Vellore before 2002 formed the core of Thiruvalluvar University. The University was inaugurated on 16.10.2002 as a State University by the then Honorable Chief Minister Selvi Dr. J.Jayalalithaa. The University is located in a sprawling campus of about 112.68 acres at Serkkadu near Vallimalai 16 km from the Vellore City on the Ranipet-Chitoor Trunk Road. The University, named after the great Tamil Saint "Thiruvalluvar", is enshrined with the motto "கண்ணுடைய ரென்பவர் கற்றோர்"

The education pattern at Thiruvalluvar University has a right blend of the academia and industry with the availability of professionals, mentors, advisors throughout the year offering enormous opportunities to the students from 4 districts of Tamil Nadu, Vellore, Cuddalore, Villupuram and Thiruvannmalai. Also provide rich and complete study experience to its students through cutting - edge amenities, research facilities that will propel the students in building a successful career path.

The University comprises of seven academic departments in the campus , six constituent colleges, one P.G. extension center and 123 colleges affiliated to the University with the jurisdiction of Vellore, Thiruvannmalai, Villupuram and Cuddalore districts of Tamilnadu State. The University was granted 12(B) status from the University Grants Commission on 24.01.2014.

About the Fort City Vellore

Vellore, a district capital in Tamilnadu, has long been known for its stately fort and temple, renowned hospital and medical college. Vellore's history record several dynasties and power. The famous Vellore Fort was built in the 16th century. Vellore fort, Government museum, Science park, vainu Bappu Observatory, Amirthi Zoological park, Religious places such as Jalakandeswarar Temple, Balamathi Hills, Vallimalai, Rathnagiri, Sri Lakshmi Golden Temple, Big Mosque and st.Jhon's Church and Yelagiri Hill station are the top tourist attractions in and around Vellore.

Thiruvalluvar University was established in Vellore by Government of Tamilnadu in October 2002 under the Thiruvalluvar University Act, 2002 (Government of Tamilnadu Act 32 / 2002). The education pattern at Thiruvalluvar University has a right blend of the academia and industry with the availability of professionals, mentors, advisors throughout the

year offering enormous opportunities to the students from 4 districts of Tamil Nadu, Vellore, Cuddalore, Villupuram and Thiruvannmalai. Also provide rich and complete study experience to its students through cutting - edge amenities, research facilities that will propel the students in building a successful career path.

Thiruvalluvar University is one of the largest universities in India with 128 affiliated colleges with a potential of excellence in higher education. The faculty members of Thiruvalluvar University are doing intensive research in various disciplines of Arts and Sciences. Science Departments (Biotechnology, Chemistry and Zoology) offers M.Sc., M.Phil and Ph.D. courses. Since its inception, the departments have witnessed a consistent rise of demand from the students for the subject. The areas of research specialization in the department include environmental biotechnology, microbial Corrosion, nanotechnology, drug discovery, nanobiosensor and development of water treatment processes, solar energy and organic synthesis, bioremediation and biofuel cell. The skill development programme and research and technical activities will strengthen the entrepreneurship.

Entrepreneurship Development Cell

Entrepreneurship Development Cell (EDC) is a forum at TU that helps budding entrepreneurs come out with their ideas and innovations and to gain knowledge about the procedure and the struggles an entrepreneur in various science fields that goes through during a startup and after the company has been established. EDC is committed to the cause of encouraging entrepreneurship among students. The cell invites various renowned entrepreneurs to share their experiences. Lectures and awareness programs are regularly conducted to enlighten the students about the joys and problems of entrepreneurship.

Guest lectures are conducted throughout the year to involve the students in the various activities.

Objectives

Workshops

To motivate and develop entrepreneurship among students by Workshops

E-Summits

To organize Entrepreneurship Awareness Camps for the benefit of the students.

Events

To arrange Events for interaction with entrepreneurs to help students learn from their journey
